

NEW Miniature Deburring Brushes

- Benefits Include:
- Longer Brush Life
 - Greater Flexibility
 - Finer Finishes

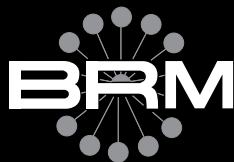

Now in Diamond

Brush Research Manufacturing introduces a new line of miniature twisted-in-wire deburring brushes made with diamond impregnated nylon filament. The brushes are available in 800 grit to meet the most demanding finishing and deburring requirements and are ideal for solving difficult deburring, edge radiusing and finishing needs in harder materials like glass, ceramic and aerospace alloys. The tools are available for both blind hole and through hole applications in a wide variety of diameters. For additional information, please contact BRM at 323-261-2193.

- Applications Include:
- Ceramic
 - Aerospace Alloys
 - Glass
 - Electronic
 - Precision Tool and Die

DIAMOND STANDARD

Diamond Filament Twisted-in-Wire Brushes
Ideal for Finishing Hard Materials

Stocked in 800 grit Diamond
Available in other grits and sizes
Filament Size: .010/800

Tools are listed by hole diameter and made oversized for optimum finishing performance
Pricing for other sizes and grits available on request
Also available in Carbon Steel, Stainless Steel, Brass, Nylon and Abrasive Nylon

Pacehigh Limited, Unit 9, Alders Court, Watchmead,
Welwyn Garden City, Hertfordshire, AL7 1LT
